

Suranjith Henry Karunakaran R

Intelligent Automation & AI Transformation Consultant

Bangalore, India | +91-8681039114 | suhek@live.in | linkedin.com/in/suhek

PROFESSIONAL SUMMARY

AI-enabled business consultant with 10+ years of experience identifying, designing, and delivering intelligent process automation and AI transformation programs across BFSI clients. Strong in analyzing business processes to uncover IPA, RPA, GenAI, and agentic AI opportunities, and in translating them into AS-IS and TO-BE solution designs, business cases, and production-ready automation solutions. Experienced in partnering with business teams, architects, and technology teams to deliver AI-driven digital transformation with measurable gains in productivity, governance, and FTE efficiency. Microsoft Certified: AI Transformation Leader.

CORE COMPETENCIES

- Intelligent Process Automation (IPA), RPA Opportunity Assessment, AI-Powered Automation, Workflow Automation, Business Process Optimization
- AI Use Case Discovery, Generative AI, Agentic AI, Agentic Process Automation, AI Solution Design, Rapid Prototyping
- Business Process Mapping, Process Mining, AS-IS / TO-BE Design, Business Case Development, Digital Transformation
- Stakeholder Management, Cross-Functional Collaboration, KPI Governance, Control and Governance Design, Value-Based Delivery

PROFESSIONAL EXPERIENCE

Senior Associate Consultant

Infosys BPM Ltd, Bangalore, India | Jan 2023 - Present

- Lead end-to-end business process assessments across BFSI domains to identify IPA, RPA, AI, and broader transformation opportunities.
- Analyze business processes and translate operational pain points into AS-IS and TO-BE automation solutions that connect process change, technology adoption, and measurable value.
- Identify and deliver automation opportunities across RPA, AI, and Agentic Process Automation, contributing to a pipeline of 100+ FTE savings and 60+ FTE reductions implemented.
- Design AI-powered automation solutions and build business cases linking solution scope to revenue, cost, productivity, and operational KPIs.
- Lead rapid prototyping of AI and automation concepts so business stakeholders can validate workflows early and reduce ambiguity before implementation.
- Convert prototypes into production-ready solutions, bridging business requirements with technology execution and delivery teams.
- Collaborate with business teams, clients, architects, and technology teams to align AI and automation solutions with enterprise priorities, governance needs, and delivery feasibility.
- Drive scalability, control, and governance considerations into automation solution design, including an AI-powered control testing tool built with LLMs.
- Manage and mentor teams while ensuring SLA adherence, KPI governance, and consistent delivery quality.
- Develop client-ready presentations and proposals that support decision-making, executive buy-in, and new business opportunities.

Additional Experience

- Associate Consultant - Led process transformation engagements, designed TO-BE solutions, and supported automation-led delivery for client teams.
- Team Lead - Led process improvement and automation initiatives, enhancing productivity, team coordination, and stakeholder alignment.
- Process Specialist - Supported transformation programs by improving process efficiency, automating reporting, and enabling KPI-driven decision-making.
- Senior Process Executive - Executed process improvements in mortgage operations, contributing to improved operational efficiency and quality.
- Business Development Executive - Supported business development and process transformation initiatives while improving operational workflows and client engagement.
- Process Executive - Contributed to process improvement and quality enhancement initiatives in mortgage operations.

PROJECTS

AI-Powered Control Testing Tool - Generative AI Project

Infosys BPM Ltd

- Designed and developed an AI-powered control testing tool using LLMs, transforming a consulting concept into a production-ready solution.
- Automated and streamlined control validation, improving governance and reducing manual effort in control testing.
- Demonstrated how GenAI-driven automation strengthens process assurance; earned multiple COO accolades for the initiative.

EDUCATION

Bachelor of Science in Computer Science

MGR College, Periyar University - 2015

SKILLS

Intelligent Automation | AI Use Case Identification | Generative AI | Prompt Engineering | AI Solution Design | AI-Driven Process Optimisation | Agentic AI | Business Process Mapping | Process Mining | Python | VS Code | GitHub Copilot

CERTIFICATIONS

Microsoft Certified: AI Transformation Leader (AB-731)

Credential ID: 54013AA09AB835FF | Certification number: F5T834-A189E3
